

**January 24<sup>th</sup> , 4:00pm**

**SCEN 604**

**Biological Sciences Seminar Speaker:**

**Dr. Hanna Jensen, MD/PhD**

**Biomedical Engineering, University of Arkansas**

## **The Heart and the Head:**

# **Implications of Cardiovascular Disease and Intervention on the Brain**

Neurologic injury is the most common and debilitating complication after cardiac procedures. Moreover, cardiovascular diseases themselves can have neurological implications – and the heart-head connection is slowly unraveling. Dr. Jensen's research is aimed at learning to protect the brain in the setting of cardiovascular complications.
